

KONICA MINOLTA

## **Konica Minolta Awarded a Three-Year Contract for Document Process Outsourcing and IT Managed Services**

**Singapore, May 11, 2017** – Konica Minolta Business Solutions Asia (BSA), an integral value provider, has been engaged by a leading automotive and engineering company to provide outsourced services for reprographic services, IT system and application maintenance and support. This service will allow the company to shift to digitalisation and free up resources to focus on their core activities.

"As an integral value provider, Konica Minolta is pleased to enable our clients to transform in the wave of digital innovation with our integrated offerings and technology," said Jonathan Yeo, General Manager, BSA.

With digitalised files and streamlined processes, the company can do away with time-consuming manual workflow process to retrieve documents, leading to a faster turnaround time for each task. The company can utilise the digitised documents for improved efficiency and proper management of the document life cycle with information integrity. This will deliver greater convenience and drive higher productivity to customer's work processes.

Konica Minolta will also provide application maintenance support and ensure the critical IT system is available to support the core functions and to provide ongoing support to maximise productivity.
